9. Believed operating: 4.

a. Pine has received four resupply drops, the last of which occurred on 16 October 1951. Weather conditions prohibited any flights during the November drop schedule. Pine failed to respond to the 15 December resupply run (weather obliterated the DX on 13 December). Five W/T contacts were made between 5 and 14 November. None have been made since. Two SI letters were received in June and August. Open letters to various KMWahoos in LQFlake since indicate that Pine is safe. For example, one letter received on 3 December stated that X and Y (original Pine pair) are active against the BQGypies and are doing "very good work". Further, "X and Y have been given the greatest possible support". This is the only BQFiend team now inside KMWahoos; it was equipped with W/T in October and for five contacts was successful communications-wise.

10. BQFiend assistance to ^{ZACABIN} ZAGactus body drops: 2

- a. Four-man team 16-17 August.
- b. Five-man team 22-23 August.
